

COURSE: 202044502 - PROGRAMMING WITH JAVA

ASSIGNMENT -1

- 1) What happens when you when you create an object?
- 2) What is instance variable hiding? How to solve it? Explain with appropriate example.
- 3) Explain finalize method in brief.
- 4) Explain constructor overloading with appropriate example.
- 5) Differentiate call by value and call by reference with appropriate example.
- 6) Why main method is static in java?
- 7) Explain nested class (static, inner, local and anonymous) with appropriate example.
- 8) What do you mean by this keyword?
- 9) What do you mean by garbage collector?
- 10) Explain method overloading with appropriate example.

COURSE: 202044502 - PROGRAMMING WITH JAVA

ASSIGNMENT -2

- 1 What happens when you when you create an object?
- 2 What is instance variable hiding? How to solve it? Explain with appropriate example.
- 3 Explain finalize method in brief.
- 4 Explain constructor overloading with appropriate example.
- 5 Differentiate call by value and call by reference with appropriate example.
- 6 What is inheritance? Why java does not support multiple inheritance.
- 7 What is interface? Explain it with an example.
- 8 Differentiate abstract class and interface.
- 9 Discuss exception and error.
- 10 What is the java collection framework? What are the benefits of the java collection framework?
- 11 What is a thread? Describe the complete life cycle of thread.
- 12 Discuss the role of thread synchronization in inter-thread communication? Explain with example.
